

Station #2. Approximately  
3/4 mile above mouth.

Half Mile Head Creek  
101-11-37  
4-28-75  
Novak

Totally, the creek is composed of 75%  
riffle, 25% pool habitat.

50% A.S.A.

Over half of the rocks were moss  
covered throughout the section  
surveyed.

H E M L O C K  
C E D A R (very limited spruce)

65' wide, 1.5' deep-----  
Station #1  
ITZ

Stream appears to have good  
potential as a chum salmon  
producer.

Small pools in upper section  
should have high coho rearing  
potential.

WATER COLOR - light brown

Large rock - sub-  
merged at high tide--

- 57 -
